(c) pursuant to an established routine maintenance and repair program, the physical plant of each facility must be kept in a continuous state of good repair and operation in accordance with the needs of the health, comfort, safety, and well-being of the patients; (d) each facility must meet all fire and safety standards established by the state and locality. In addition, any hospital must meet the provisions of the life safety code of the national fire protection association that are applicable to hospitals. A hospital must meet all standards established by the state for general hospitals to the extent that they are relevant to psychiatric facilities.
